Amsler Luisina

ALT: CorvusRGB

Technical Designer | UX/UI Specialist & Front-End Developer.
UX/UI Generalist (Figma, Git, 3D & Digital Art) – Specialist in Visual Identity, Iconography & Code.

Tools/Areas

- **Front-End Development (React, JS, CSS & Vite)**

Translating design systems and interactive prototypes into a clean, semantic, and structured code; optimizing web performance; implementing responsive layouts; and creating modular, reusable components—all while ensuring complete visual fidelity to the original Figma design.

- **Figma - Interface design and prototyping**

Creation of user flows and low- and high-fidelity wireframes. Specialist in defining and designing information architecture for complex platforms through the creation of sitemaps.

- **Git y GitHub / GitLab**

Team workflow management, conflict resolution, and management of branches and pull requests.

- **Affinity Designer/ MediBangPaint Pro**

I employ a workflow that integrates vector design in Affinity Designer (digital illustration and UI iconography) and illustration development using specialized software (MediBang Paint), ensuring high-resolution deliverables and efficient layer management for future editing.

- **Blender // Solidworks [CAD Software]**

3D development with an end-to-end workflow: parametric modeling of high-precision components in SolidWorks. Featuring optimization, texturing, and photorealistic rendering of assets in Blender.

By mastering vector illustration, 3D modeling, and front-end development, I offer hybrid visual and interactive solutions. This allows me not only to enhance the aesthetic identity of the platform or product but also to ensure that the designed visual experience is translated with technical precision into the final code.

Education

2026
- Initial Web Programmer Diploma - Front End Developer.
// Centro de e-Learning UTN BA.
Universidad Tecnologica Nacional.

2022-2025
- Higher Technical Diploma in Graphic Design and Visual Communication
// IES - Instituto de estudios superiores

2026
- course “Web Design and User Experience (UI/UX)"
// FADU - Facultad de Arquitectura, Diseño y Urbanismo- Universidad Nacional del Llitoral.

2026
- Course- Product design with SolidWorks
// Centro de e-learning UTN
Universidad Tecnológica Nacional.
